Subject Index to Volume 19

A

Absorption, interest rates and household, 129
Adelman and Morris factor analysis, developing countries, 407
Adjustment costs, model for estimation and testing, 153
Applied general equilibrium evaluation with imperfect competition, interdependence model between Japanese and EC industries, 537
Argentina, MERCOSUL, 1
ARIMA, patent application filings, modeling and forecasting in U.S., 491

B

Banking services, international trade, 119
Belgium, interest rates and household absorption, 129
Bounded rational learning, Monetary Union in Europe, 469
Brazil, MERCOSUL, 1
Budget deficits, sustainability, 661

C

Capital mobility, developing countries, 605
Children's health, labor input in rural Indonesia households, 567
Cointegration analysis
  fertility analysis in low socioeconomic level countries, 441
  import demand behavior, 187
Cointegration/vector error-correction approach, temporal causal relationship between real income, prices, and energy consumption, 417
Commodity markets, stabilizing prices, 253
Common Agricultural Policy, lobbying benefits, 635
Computable general equilibrium (CGE) model
  policy analysis, 79
  sensitivity analysis of economic equilibrium model, 175
Consumer behavior, wheat sector and flexible policy rules, 207
Consumer price index, restricted forecasts and economic target monitoring, 333

D

Defense expenditures, economic stabilization and excessive, 381
Demand function, housing in Bombay Metropolitan Region, 295
Developing countries
  factor analysis, 407
  fertility analysis in low socioeconomic level countries, 441
  financial repression and fiscal policy, 351
  saving-investment correlations and capital mobility, 605
Domestic money markets, impact on Eurocurrency rates, 41

E

Econometric analysis
  patent application filings, modeling and forecasting in U.S., 491
  trade pattern changes in world iron ore and steel, 237
Economic equilibrium model, sensitivity analysis, 175
Economic factors, environmental regulations, 683
Economic growth, temporal causal relationship with energy consumption, 417
Economic stabilization, excessive defense expenditures, 381
Economic target monitoring, restricted forecasts, 333
Economic welfare, flexible policy rules effects, 207
